Rank 40

Filecount per commit

Shows how many commits had changed one file, how many had changed two files, and so on. The chart is limited to 30 lines for improved readability. The data preview also includes overall statistics including the number of commits that are filtered out in the chart.

Preview data

Sum of commits that changed more than 30 files (each) = 1640

Max changed files with one commit = 4041

	filesPerCommit	commitCount

Bar chart with the number of files per commit distribution

Changed files per commit

Pairwise Changed Files

This section analyzes files that were changed together within the same commit and provides several metrics to quantify the strength of the co-change relationship:

- **Commit Count:** The number of commits in which two files were changed together.
- **Commit Lift:** A ratio that indicates whether the co-change pattern is stronger than random chance, given how often each file changes.
- **Jaccard Similarity:** The ratio of commits involving either file that also involved both files.

The following tables show the top pairwise changed files based on these metrics. The following charts show how these metrics are distributed across pairs of files that were changed together.

Treemap with files changed frequently with others

Files that likely co-change with others in update commits

Co-Changing files in update commits max lift (1=random, >1=more than random, <1=

Co-Changing files in update commits average lift (1=random, >1=more than random,
